Reporting Completion

- Company has achieved **100% Reporting**: all focus areas were marked "Complete."
- Dashboard graphs may show less than 100% due to the **curve-based scoring system**, which distributes 100 points per focus area across metrics and further across the Achievement metric components (Commit, Track, Deliver, Made Public).

Key Clarifications

- Point allocations have remained consistent from 2023–2025.
- Metrics are **not compliance mechanisms**; they are designed to encourage continuous improvement and step-by-step progress.
- Company's reporting data is visible only to Company employees or those granted dashboard access by the Company Primary Contact.
- Only **aggregate industry data** is shared publicly with Meat Institute staff or external audiences.

Future Direction

- In 2026, metrics will shift to a simplified **yes/no format,** eliminating curved scoring and providing clear, audit-style results.
- Variations in averages reflect differences in Company participation and how many achievement components (Commit, Track, Deliver, Made Public) are completed.
- For a detailed breakdown of Company's reporting status, support@piestar.com can confirm all metrics were answered and marked complete or provide the most recent report.
