

Health and Wellness Award

COMMUNITY WELLNESS

- Since 2018, Marcus has rerouted nearly 50 million pounds of protein away from landfills, saving over 4,600 metric tons of carbon and 29 million gallons of water.
- Almost 4 million pounds of protein have been redirected to food banks and discount retailers, giving families access to essential nutrition instead of letting good food go to waste.
- Every month, Marcus donates \$15,000+ to cover the cost of protein and shipping for food banks. We're not just moving products, we're moving communities forward.
